Poppy

AND NOW A FEW WORDS FROM ME...

Hi there! My name is Poppy. I'm the smallest little lady you will ever meet, but don't let my wee size fool you, I'm full of energy and sass. I play hard and I nap even harder. When I'm not playing with my toys or snoozing on my dog bed, I'm probably stealing your slippers, wrestling with my foster sisters or chewing on a bone nearby, sharpening my puppy teeth. I love being wherever you are, usually right under your feet, and I prefer to keep you in my sight at all times. This means I don't typically wander off or get into too much trouble on my own but be wary if you haven't seen me in a while because I'm probably chewing your shoes (they're my favourite). I'm a really affectionate girl and my foster mom says I've been a dream to train. I really love treats and I'm super smart, so when you combine treats with my training I catch on really fast. I also love people and other dogs. Right now I live with two fur sisters but when I go to work I hang out with all of the other office dogs too, it's so fun. I would really love to be adopted into a home that has another young dog so that I have someone to play and snuggle with. Maybe you have a fur kid that's looking for a bossy little sister this Christmas?

I AM...

- Energetic
- Playful
- Affectionate
- Smart
- Food motivated
- Spunky & sassy
- Snuggly & sweet
- The bestest girl you'll ever meet.

Poppy

AND NOW A FEW WORDS FROM MY FOSTER FAMILY...

Poppy is the sweetest, smartest and most adorable pup. She is keen to learn and highly food motivated so training her has been a breeze. Poppy is kept on a very regular schedule with 3 meals per day and pee breaks provided every 60-90 minutes when she is not in her crate or sleeping. This has helped immensely with her housetraining and accidents are non-existent now. In recent days, Poppy has even begun to whine when she needs to go outside! Poppy has the pleasure of going to work every day and is the hit of the office. She has also attended several public events and has even gone shopping. As a result, she is well socialized with people, kids and other dogs. Poppy loves to play and be near her family so she will require a home that has another young dog for company and pawrents who will be home with her regularly. Her crate time is kept to 2 hour intervals for a maximum of 4 hours per day, with the exception of bedtime. It is important that her new family be able to maintain this schedule. While Poppy doesn't mind her crate and will go into it for naps on her own accord, if you place her in there against her will she will make a dramatic fuss for a while before quieting down. At bedtime, Poppy is allowed to fall asleep snuggling and then she is placed in her crate all warm and cozy, which has proven effective at settling her without any noise. Poppy's dream is to sleep in the big bed when she becomes a big girl. Poppy has learned to walk on a leash using a harness with great success, however her small size limits the distance she can go. Currently, she is carried in between bouts of walking to give her wee legs a rest although she'd much prefer to walk until she drops. Poppy is a spunky, fearless and loving little girl who will make any family very happy. Her cute and charming personality have won the hearts of everyone she has met thus far. Poppy was born with two small hernias, one of which resolved itself, but her umbilical hernia remains. This hernia doesn't cause her any issues and may also disappear as she grows but if it doesn't she will require surgery to correct it. The surgery will be completed at the same time as her spay. For now though, continued monitoring, in consultation with a veterinarian, is required.
